PROFILE

Senior full-stack engineer with 5+ years of experience building scalable web platforms, content systems, industrial software, and cloud-backed product services. I work from interface to infrastructure, with a focus on performance, clear architecture, and systems that hold up under real use.

PROFESSIONAL EXPERIENCE

Senior Software Engineer · Autodesk via Quarks Technosoft Dec 2024 - Present
Bangalore, India

- Lead full-stack delivery across global web and learning platforms in a 15-member cross-functional team.
- Reviewed 300+ pull requests, led student-facing services, collaborated with product and UX, and served as rotating Scrum Master.

Software Engineer · Siemens Technology Aug 2023 - Dec 2024
Bangalore, India

- Built industrial monitoring and predictive-maintenance products across frontend, backend, integrations, and delivery.
- Shipped real-time workflows and Docker-based production releases with a focus on performance and reliability.

Analyst · Accenture AI Jun 2021 - Aug 2023
Bangalore, India

- Developed enterprise frontend applications and API integrations with Angular, React, Node.js, and PostgreSQL.
- Supported production delivery across Azure and Google Cloud while improving performance, reliability, and usability.

SELECTED PROFESSIONAL WORK

Global Web Platform Migration AUTODESK
Next.js · TypeScript · Node.js · AWS · Contentful · WebSockets

- Migrated 100+ pages from several legacy frontend stacks into one structured, Contentful-driven architecture.
- Improved page loads by 15-30%, raised Lighthouse scores from 60-70 to 80-90, and supported growth from 1M to 5M+ monthly page views.

Learning Platform Modernization AUTODESK
React · Next.js · TypeScript · Node.js · Deno · Redis · AWS · WebSockets

- Delivered 30+ features across course creation, support sessions, integrations, authentication-aware flows, caching, and scheduled services.
- Improved performance by 15-30%, lifted initial engagement by 50%, sustained 5-10% quarterly growth, and increased course creation by 15%.

SELECTED PROFESSIONAL WORK - CONTINUED

Industrial Health Monitoring Platform

SIEMENS

React · Node.js · Express · Zustand · InfluxDB · MQTT · Docker

- Reduced monitoring time by 40% with responsive performance views and clearer operator workflows.
- Took the system from proof of concept through user testing to containerized production releases.

Real-Time Shop-Floor Operations Platform

SIEMENS

Angular · Node.js · Express · WebSockets · MQTT · OPC UA · Nexe · Docker

- Reduced data lag through real-time synchronization and reliable machine-to-cloud feedback loops.
- Streamlined setup, reporting, and deployments with industrial integrations, Docker, and standalone executables.

Enterprise Customer Experience Platform

ACCENTURE

Node.js · Express · PostgreSQL · GCP · Microservices · Monolithic Architecture · Nexe · Docker

- Built APIs, cloud-storage integrations, role-management workflows, and the service foundation from the ground up.
- Improved application performance by 50% and reliability by 40% while evolving the system toward microservices.

M&A Workflow Platform

ACCENTURE

Angular · Node.js · Express · PostgreSQL · Azure · Custom Algorithms · Docker

- Improved performance by 40%, scalability by 50%, deployment time by 35%, and operational cost by 20%.
- Raised user engagement by 20% and usability by 30% while automating repetitive review steps.

TECHNICAL RANGE

Frontend: React, Next.js, Angular, TypeScript, JavaScript, HTML, CSS, SCSS, Redux, Zustand, Material UI, shadcn/ui, Framer Motion

Backend and cloud: Node.js, Express, Deno, REST APIs, WebSockets, microservices, Redis, PostgreSQL, MongoDB, DynamoDB, AWS S3, SQS, Lambda, CloudFront, Docker, Serverless

Platforms and tools: Contentful, AEM, Adobe Analytics, Prisma, Sequelize, Jest, Mocha, Chai, OAuth 2.0, SSO, SAML, Passport.js, Figma, MQTT, OPC UA, InfluxDB, Nexe

EDUCATION

Chandigarh University

Jul 2017 - Jul 2021

B.Tech in Computer Science · GPA 7.5/10
